

Accessibility Plan 2019-20

Aim	Issue	Action	Cost	Person Responsible	When
Ensure that students with SEND are aware of the support available at EMS	Limited information regarding SEND may put some students off applying to the school.	Add information about student support, including SEND, to the next edition of our prospectus	£1000	Susie Catling	Dec 2019
Ensure that all visitors with access need are aware of the facilities and know who to contact for support	One parent has highlighted to us that our paper work does not tend to make it clear that we have a lift available or other support for those with disabilities. We have added this information to our website but need to review paperwork too.	Review paperwork that is sent to prospective visitors regarding access arrangements.	£0	Nicola Mitchel (Susie, Sophie, Jane and Tor)	From Sept – August (review throughout the year as letters are sent out)
Improve the usefulness of our first aid room and ensure it is compliant with safeguarding.	Our first aid room does not have a vision panel on the door but we also have students that need full privacy when, for example, they have a nap in the room.	Change the fire door to one with a full length vision panel Add a blackout blind that can be used when individuals occupy the room	£500	Nicola Mitchel	Oct 2019
Improve the access to school information for those with visual impairments	In the previous academic year we equipped the school to support deaf students/parents but have no provisions for those that have visual impairments.	Research potential text-to-speak options for the website (e.g. Browse aloud) Make reasonable adaptations to the website in light of research.	£500	Joe Rowing Kerry Burnham	Nov 2019 May 2010
